BEAVERFIT

BeaverFit is committed to the relentless pursuit of excellence, to accurately supply equipment that is innovative and can provide the most useful function for businesses and consumers alike.

Through the power of partnerships, we have the ability to assist you with all the provisions needed to ensure that your requirements are adhered to.

Not only is BeaverFit the global leader in the design and manufacturing of gym equipment, but are also trusted by militaries all over the world.

BEAVERFIT™

BeaverFit was originally founded out of a challenge by the British Military. Since then, the company has gone from strength to strength; providing equipment worldwide to military units, corporations, private gyms, universities, health clubs and more.

BeaverFit was created by Tom Beaver and grew out of a personal passion for the toughest endurance based fitness training. Incorporated in 2010, BeaverFit has gone on to be a world leader in the production of training equipment.

BeaverFit is the original designer and manufacturer of shipping container training lockers, with over 9 years experience making and refining these unique products. We have supplied products to militaries worldwide and continue to be a market leader in the supply of military fitness equipment. Our ability for the manufacturing of custom training rigs has also been enjoyed by David LLOYD Gyms, The RFU, The Reebok Sports Club, Fusion Lifestyle, 1 Life, Exercise4Less, Jumeirah Beach Hotel Group, 1REBEL, Bulgari Hotel and much more.

We Create What Does Not Yet Exist.

BeaverFit originated from a family of Steel Fabricators, specialising in the industry since 1947.

In 2006, Tom Beaver built a robust and innovative Rig to train for the Arch to Arc challenge, made entirely from materials used by the family business.

Tom Beaver successfully introduced his product of excellence to the military. Thus, the birth of BeaverFit and further development of innovative products and fitness solutions - dominating the Industry since 2010.

Co-founders, Tom and Jim Beaver further developed the product line to introduce the worlds first ever container gym solution - The FOB Locker. Since 2012, over 500 of these solutions have been deployed around the UK and Europe.

BeaverFit UK joined forces with two veterans from the USA, forming our sister company BeaverFit North America, LLC and imminently winning their first contract with the U.S Marine Corps to supply 300 FOB Lockers.
