Fitness Division

Introduction

As a respected company we have carefully selected which manufactures we work with. Gymcare is not in the market to supply cheap material in order to win contracts, we select the best products from the like of USA and UK at the best possible prices.

Offering well-built safe and reliable products all of which are suitable from amateur to professional use. Gymcare continues to supply high end fitness brands such as HOIST, Hampton Fitness, Landice Fitness, Ffittech, and Exigo.

With numerous manufactures approaching us on a monthly basis together with 10 years of research and experience, we believe we have the best range of products from residential to commercial use.

Our suppliers between them have hundreds of awards within the fitness industry and breakthrough technology, with further customers such as 'Mr. Olympia' Phil Heath, Arnold Schwarzenegger, 24 Hour Fitness and many more.

We distribute

HOIST Fitness is a Poway, California (USA) based company producing premium strength training and LeMond indoor cycling products for the commercial and home markets.

The company's commercial products can be found all over the world in health clubs, YMCAs, community centers, hotels, personal training facilities, colleges & universities, corporate fitness centers, government facilities and military bases.

We distribute

LeMond Fitness - The Spin Cycles from LeMond Fitness are the most convenient piece of equipment in the fitness category and have been preferred by the professional trainers, because of their superior quality, extreme comfort and long lasting durability.

As the first American to win the Tour de France, Greg transformed the world of cycling. LeMond, powered by HOIST Fitness bikes reflect Greg's same passion for cycling products that break out of the mold.

Tired of indoor training, exercise bikes, and bike trainers that have nothing to do with cycling at all, Greg has reinvented this product category – making LeMond the industry gold standard for high quality and exceptional performance in stationary cycles.

Designed like great road bikes, all LeMond exercise and training bikes offer user-friendly adjustments and innovative cycling programs to make a workout and training program more effective. We also believe in giving back, supporting young cyclists, helping athletes train, and working with kids to instill a lifelong appreciation of the power of being fit.

We distribute LANDICE

Every Landice product is built with commercial-grade quality and crafted to withstand the most demanding workout environments. While Landice is made for the needs of residential use, our training equipment is also used by commercial gyms, physical therapy and rehabilitation centers, hospitals, police and fire departments, colleges and universities and professional sports teams.

You can be assured that each Landice machine provides a reliable, durable and easy-to-maintain experience.

Landice Fitness is so confident in the workmanship and quality of their equipment that they provide one of the industry's best warranty for their residential machines.

 LANDICE

CAUTION: Risk of injury to persons. To avoid injury, use extreme caution when stepping onto or off a moving belt. Read instruction manual before using. Do Not Allow Children or Those Unfamiliar with its Operation on or near this Equipment.

E9 ELLIPTICAL

One of the most economically designed ellipticals, with a footprint 20% smaller than others on the market. Takes up less space while providing the closest replication to running outside without the impact. Stride length adjustable from to accommodate to multiple user needs.

U9 UPRIGHT BIKE

Complete with comfort, convenience and innovation the Landice U9 represents the new standard in reliability and performance.

R9 RECUMBENT BIKE

Our Landice R9 recumbent bike offers a comfortable training option with superior back support and provides a safe and practical exercise alternative for any residential and commercial setting.

L10 TREADMILL

The L10 is our newest treadmill specifically designed for demanding club environments. With its 5-horsepower AC drive, the L10 is the perfect complement to any high-use setting.

L9 CLUB TREADMILL

For the most demanding settings, the L9 Club is the highest-quality treadmill available anywhere. Engineered for the serious runner, its large 55.88 cm x 210.82 cm (22" x 63") running surface, thick 8.89 cm (3/2") steel rollers and 226.8 kgs (500-pound) user weight capacity will handle even the harshest institutional needs.

We distribute

We distribute
Manufactured and designed in UK

Exigo®

Exigo is a privately owned and forward thinking UK fitness brand. We manufacture and supply innovative gym equipment and accessories for the UK and European fitness industries.

Our product range is extensive and incorporates all aspects of strength and functional training and boxing. Whether it's a full commercial gym fit-out or a one-off piece of equipment, Exigo offers you the complete end-to-end solution across design, manufacture and installation.

We distribute

Hampton Fitness was founded on the idea that free weights aren't a "necessary evil" for fitness facilities; they're an essential part of the foundation of any gym. Hampton's founders had years of experience in iron and steel manufacturing before entering the fitness industry with the launch of Hampton Fitness in 1996.

Hampton is committed to a tradition of innovation that can be seen in such product lines as its new Gel-Grip Urethane Series, Jelly Bells, Hybrid Barbells, Eclipse, Fusion, Dura-Bell, and Chrome Beauty Grip. If a change doesn't advance the art of fitness cosmetically or functionally, then Hampton doesn't add it to their line.

But it's not only about the iron. Hampton knows that attractive, space-efficient storage displays can be as important to club owners as the weights themselves, so they spend almost as much time on the racking design as they do on what's going on the rack.

Gymcare Design Team

In keeping with our commitment to enhancing the standard of the fitness industry in the country, we have put together a panel of specialists who have come under the common banner of Gymcare Design Team to focus only on fitness projects.

The Gymcare Design Team, thus comprises, architects, interior designers, sports specialists and technical experts who work with our Customer Support Service in conceiving of, planning, executing and maintaining fitness facilities.

This turnkey effort is backed, additionally, by inputs it might seek from any of our principals abroad.

Customer Support

The backbone of Gymcare, the CSC is staffed with a selection of handpicked engineers with academic qualifications, interest and natural inclination in and towards fitness.

The head of CSC has been trained by engineers from Hoist International USA. The CSC staffers have trained personnel at all our installations besides having offered valuable insights to established fitness center managers and instructors on a one-time or ongoing basis.

The CSC is also responsible for working out floor plans and 'placing' our equipment and machines on a given floor plan as well as working out the optimum and ideal combinations for any fitness facility, which may range from personal to institutional.

The CSC undergoes informal training sessions with the aid of:

- Audio-visual material brought from our principals abroad;
- Catalogues and training manuals considered mandatory reading and
- Regular interaction with its counterparts abroad.

We care

Our service engineers are highly skilled with years of experience and knowledge with the fitness industry so you know your equipment is in good experienced hands.

The following services shall be provided including the installation of the equipment:

- Training of staff, initially and as and when mandated (not at random).
- All service calls shall be responded to within 24 hours of the call.
- Services shall be rendered on working days, Saturday thru Thursday between 9:00am hours to 6pmHours.
- The equipment shall be serviced under terms and conditions, under normal circumstances.

Annual Maintenance Contract

Undertaking of Annual Maintenance Contract (AMC), in order to keep the fitness center out of any issues.

AMC is carried out by our skilled service technicians every Month,Quarterly or Half-yearly depends upon the terms and condition agreed by both the parties.

Our long established and highly regarded equipment maintenance service delivers the guaranteed fix times that your users demand, minimizing downtime and protecting your investment in Fitness
